FAX: (510) 540-2152**RE:** Perchlorate Monitoring at Anderson Reservoir**CC:** M. Yee, File - 4310027**MESSAGE:**

Transmitted, per our 9/25/97 discussion, is a copy of my 9/19/97 PROF note to Mel Yee that discusses perchlorate monitoring at Anderson Reservoir and a copy of a map showing the proximity of United Technologies to Anderson Reservoir. The detailed maps of Anderson Reservoir that we discussed will be sent to you by mail as they are too large to fax.

Subject: Anderson Reservoir - Perchlorate (4310027)

I spoke with Jim Scott, Lab Supervisor on 9/19/97 9:55 am for an update on their perchlorate monitoring. The discussion is summarized as follows: (1) Anderson Reservoir and Santa Teresa WTP Effluent (100% Anderson) were sampled on 9/15/97, (2) Coyote Reservoir was sampled on 9/16/97, as the physical location of UT with respect to the reservoirs was unknown at the time, (3) test results will be available in two weeks, (4) SCVWD is pursuing lab approval for perchlorate analysis, (5) Shingle Creek is a tributary to Los Animas Creek, which is a tributary to Anderson Reservoir, (6) Los Animas Creek is currently dry (summer season) and only flows during the winter season, (7) SCVWD will collect 3 additional samples from the reservoir for baseline purposes (in the region of Los Animas Creek, at the intake portal, and at mid-point near Packwood Cove) and will resample the sites after the first rains to see if they get anything.

Subject: Anderson Reservoir - Perchlorate (4310027)

I spoke with Jim Scott, Lab Supervisor on 8/26/97, 1:50 pm and informed him of information provided to us by Michelle Moustakas, USEPA on 8/18/97, 12:34 pm as follows: (1) United Technology operates in the vicinity of Anderson Reservoir, (2) activities include rocket engine testing, and (3) reservoir should be sampled for perchlorate analysis.

J. Scott indicated that he had heard similar information last week and will follow-up with sampling the reservoir for perchlorate.
